

TAKEBUL ISLAM

Full-Stack Web Developer

Nazirpur, Pirojpur, Bangladesh | +880 1799-439775 | takebulislam@gmail.com

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

CAREER OBJECTIVE

Full-Stack Web Developer with hands-on experience building and shipping complete web applications using React, Next.js, and Node.js. Comfortable across both frontend and backend, including implementing authentication and access-control logic. Enjoys turning ideas into working features and focuses on writing clean, scalable logic that makes a product feel modern and polished. Seeking an entry-level remote or hybrid role—full-time, internship, or freelance—to keep growing toward becoming a well-rounded full-stack developer.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+)

Frontend: React, Next.js, Tailwind CSS, HeroUI, DaisyUI, Lenis, GSAP, Framer Motion, Recharts

Backend: Node.js, Express.js, JWT, Better Auth, REST API, Stripe

Database: MongoDB

Tools: Git, GitHub, VS Code, ESLint, Prettier, npm, Vercel, Netlify, Render

AI Workflow: Gemini, GitHub Copilot, Claude, ChatGPT

PROJECTS

StartupForge

[Client](#) | [Server](#) | [Live Site](#)

A two-sided marketplace web app connecting early-stage startup founders with collaborators — developers, designers, and growth specialists.

Tech Stack: Next.js, React, Node.js, Express.js, MongoDB, Better Auth, Stripe, Framer Motion, Recharts, Tailwind CSS

- Built separate founder and collaborator dashboards with opportunity postings and an applicant/application tracker.
- Required a 100% complete profile before a collaborator could apply, and enforced plan-based application limits.
- Implemented role-based access control with a dynamic homepage banner for guests, founders, collaborators, and admins.
- Protected API routes with token-authentication middleware that verifies session tokens and user role.
- Built a separate Admin Dashboard with real-time platform stats, a startup moderation workflow, and a user ban/unban system.
- Implemented Stripe-based premium subscriptions with a "Verified" badge, a transactional email system, and bookmark/notification features.
- Debugged and fixed real production issues after deployment, including data-handling and update/delete bugs.

TutorBook

[Client](#) | [Server](#) | [Live Site](#)

A tutor-booking platform where students can browse verified tutors by subject and schedule, and book sessions directly.

Tech Stack: Next.js, React, Node.js, Express.js, MongoDB, Better Auth, JWT/JWKS, Swiper, Tailwind CSS

- Built tutor listing and profile pages with subject, schedule, and hourly-rate details.
- Built a booking flow with slot availability and session-date checks.
- Used Better Auth for email/password and Google login, issuing JWTs verified server-side via a remote JWKS key set.
- Built name-and-subject search with MongoDB \$regex and date-range filtering with \$gte/\$lte.
- Implemented a logged-in password-change feature and a dark/light theme toggle.

EDUCATION

Bachelor of Arts (Honours) in English

2025 – Present

Suhrawardy Government College, Pirojpur • 1st Year (Honours)

Alim — Higher Secondary / Intermediate Equivalent

2024

Sarsina Darussunnat Kamil Madrasah, Pirojpur • Bangladesh Madrasah Education Board • GPA: 4.71/5.00

CERTIFICATIONS & COURSEWORK

- Full-Stack Web Development — Programming Hero, Certificate of Completion with Excellence (Jan – Sep 2026)
- Completed all Programming Hero assignments with full marks.
